# CONFERENCE INTROCUCTION

## Session Format

This scientific program encompasses cutting-edge topics in hernia surgery, catering to specialized surgeons with a focus on the latest advancements, prevention strategies, technological innovations, and emergency management. Each session combines keynote lectures, panel discussions, and networking breaks to facilitate knowledge exchange and collaboration among attendees.

## Introduction Lecture

A keynote lecture by a leading expert in the field will kickstart each session, providing an overview of the topic and highlighting key points for discussion.

## Interactive Polling (session 1 and 5)

Following the introduction lecture, the audience will engage in interactive polling sessions using mobile devices or audience response systems. Poll questions will be strategically designed on case reports presentation to provoke thought, spark debate, and gauge audience opinions on relevant topics.

## Panel Discussion and Expert Analysis

After the polling session, a panel discussion featuring three experts will commence. These experts will analyze the results of the polling session, provide insights into audience perspectives, and offer their own commentary on the topic at hand. The panelists will represent diverse viewpoints and expertise, enriching the discussion with their insights and experiences.

## Summarization of Takeaway Messages

At the conclusion of each session, the panelists will collaborate to summarize the key takeaway messages and actionable insights gleaned from the discussion. These summaries will be presented to the audience, reinforcing learning outcomes and facilitating knowledge retention.
